

creative city

Monday Mailer #24

March 09, 2020

Visit www.CreativeCitySchool.org or call 443-642-3600 for more information any time.
Creative City Public Charter School is a Title I school!

Does your child need a ride to school? Can you give a student a ride?

We have a plan to set up a strong system to connect families who need help getting to school (driving, walking, MTA) with families who can help. Please fill out a quick survey to let us know if you can help or if you need help:
www.creativecityschool.org/news

Last Friday, we launched a Joe Corbi pizza fundraiser for Creative City. Order forms will be due on March 23rd. Ask your student to share this information with you or pick up a catalog in the main office. It looks delicious!

Mon April 6 to Mon
April 13, school
resumes Tues April 14

Veering Away from Viruses by Creative City Snoopers –

Alvin, Ty’Nia, London, Ryder, Kyree, Prince and Sarah

What is a virus? the word “virus” comes from the Latin word “virulentus” meaning “poisonous”.

Viruses are a type of germ. They are very tiny particles, and when they get inside your body, they can make you sick. Common types of viruses are colds, chicken pox, measles, and the flu. They enter the body through areas like the nose and mouth.

Viruses are passed on by being very close to someone, and we can transmit a virus by sharing items, living or working with people, or having very close contact. Sometimes, **viruses can be hard to avoid.**

What are some ways you can protect yourself from a virus?

1. Build you immune system “army” by having a healthy lifestyle, such as eating fresh fruit and vegetables, plenty of exercise, sleep and drinking fresh water.
2. Wash your hands correctly and very well
3. Do not touch your eyes, nose and mouth, and practicing basic hygiene.
4. Disinfect touched services frequently
5. Cover your coughs and sneezes with a tissue.

Coronavirus: 2019 a new type of coronavirus (COVID-19)

According to Time for Kids, the “Coronaviruses are a group of viruses that can infect animals and people. Some cause mild illness, like the common cold. Others can lead to serious illness. The type causing the current outbreak is new to Scientist. It has been linked to a market in Wuhan, China. It’s possible the virus moved from animals to humans there. “

Viruses that move from animals to humans are more difficult for scientists to understand and find a cure, but scientists are working to find out more about the virus.

Symptoms: fever, cough and hard breathing.

Elderly people seem to be more at risk than younger according to statistics. The virus seems to affect adults more than children, fewer cases for children have been reported.

Creative City Quotes:

What do you know about the coronavirus?

“It is a bad disease that I want to avoid at all cost.” - Ryan, 5th grader (Mr. Fitzmeyer Class)

How do you feel about the Coronavirus?

“I don’t like it, I think it is bad”, said Jackson a Kindergarten from Ms. Lewis class.

CCPCS Board of Directors

Are you interested in joining Creative City's Board of Directors? An interest form is available on Class Dojo or in person in the main office. Check it out and consider whether this might be the right fit for you!
